

Feed Finder Chart

1 Start Right
The right start for mare and foal

- Designed for broodmares, foals and weanlings
- Excellent for mares in the final stage of gestation and throughout lactation when nutrient demands are highest
- Small, nutrient-dense extruded kibble for the developing digestive tract of young horses

EXTRUDED FEED

2 Peak Sweet
For performance horses involved in moderate to heavy activity

- Designed for performance and growing horses in training, stallions and hard keepers
- High energy source with 10% fat and optimum starch levels for performance
- A higher protein, balanced diet that includes Canadian oats

TEXTURED SWEET FEED

2 Peak Extruded
For performance horses involved in moderate to heavy activity

- Designed for performance and growing horses in training, stallions and hard keepers
- High energy source with 10% fat and optimum starch levels for performance
- Extruded product allows for enhanced starch digestibility for hind gut health

EXTRUDED FEED

3 Classic Sweet
Original sweet feed formulation

- Designed for mature horses involved in light to moderate activity
- Fortified with Botanical Guardin® that modifies fatty acids of the diet and provides additional antioxidants
- Balanced nutrition will help maintain body condition of the horse under light to moderate exercise

TEXTURED SWEET FEED

4 Complete Rocky Mountain Crunch or Pellet
The forage extender option

- Designed for mature horses, and for situations where forage quantity and/or quality is limited
- Optimum fibre feed for mature horses
- Easy and Convenient

EXTRUDED AND PELLETTED FEED OPTIONS

5 Maintenance
For horses prone to eating too fast

- Designed for mature horses requiring less dietary energy and protein
- Large kibble encourages horses to eat slowly, encouraging chewing and saliva production
- Very palatable, makes a great treat

EXTRUDED FEED

6 Senior
Make your senior horse feel young again

- Designed for older horses, hard keepers and mature horses having difficulty maintaining condition
- Easy consumption for horses with dental issues
- Extrusion and ingredient choices assist in digestion and nutrient absorption

BLENDED EXTRUDED & PELLETTED FEED

7 Supplement Pellet
Low inclusion balancer for any horse

- Feed as a supplement to balance out forage, pasture or non-fortified feed and grains
- Well suited for stables offering a complete nutritional program
- Cost-effective way to ensure the nutritional needs of each horse

PELLETED VITAMIN & MINERAL SUPPLEMENT

7 Horse Mineral
Low inclusion balancer for any horse

- Suitable for broodmares, horses on pasture and over-conditioned horses
- Feed to optimize the value of hay, pasture or non-fortified feeds or grains
- Cost-effective to top dress any horse's non-fortified feeds, or mix 50/50 with loose salt and feed-free choice

GRANULAR VITAMIN & MINERAL SUPPLEMENT

8 Hi-Fat
A cool energy feed that helps get the work done

- Designed for hard-working performance horses or horses that require fat-sourced energy for weight management
- Combination of high fat, high fibre, and low non-structural carbohydrates (NSC)
- Fat sources include canola oil, ground flax, and rice bran

EXTRUDED FEED

CR ProFibre Crunch
Low sugar feed for sugar sensitivity

- A safe option for horses that have metabolic disorder, Cushings disease, or have foundered
- Provides energy in the form of fermentable, digestible fibre sources (25%)
- Contains no added sugar and minimal starch for a total NSC of < 10%

BLENDED EXTRUDED & PELLETTED

GAP GenAPro
High fibre, low sugar and starch complete feed

- A consistent quality forage replacement option
- Higher protein levels are consistent with what would be provided in hay
- Mini cube feed form encourages chewing and saliva production.

Broodmares & Growing Horses

Broodmares & foals

Optimizes development of growing horses

Mature Horses

Involved in light to moderate exercise

When forage quality &/or quantity is limited

Doing minimum exercise

Maintaining health of senior horses

Specialty Horses

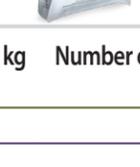

Involved in intense/heavy activity

Hoof health & ration balancer

Sugar sensitivities

The Step Right Premium Equine Feed® program is designed to meet the needs of horses through every stage of life and at every activity level.

Each Step Right product is fortified with SmartStep BeneFit Pak® that assists the horse by modifying fatty acid composition of the diet and providing additional antioxidants to the feed.

All fat sources are non-hydrogenated vegetable oils that provide a good ratio of omega-3 and omega-6 fatty acids, which encourages a shiny, healthy coat.

Step Right extruded feed products offer improved digestibility and convenience with little dust and fines at the bottom of the bag.

SmartStep BeneFit Pak® is a proprietary blend of organic selenium, yeast, flax, non-hydrogenated vegetable oil, chelated trace minerals, lysine, vitamin E, methionine, turmeric, yucca schidergia and more.

Individual results from the use of this product may vary as a result of differences in management environment, genetics, health, sanitation, and other factors. Therefore, Trouw Nutrition Canada Inc. and its brands Hi-Pro Feeds and Step Right Premium Equine Feeds, its affiliates or its distributors do not warrant or guarantee individual results and shall not be held liable for any gaps in the results.
