## Making Feed on the Farm

### Poultry Grower/Finisher

- Mix 150 kg #150081 36% Poultry Supplement with 850 kg #011401 cracked wheat or #011301 whole wheat
- Use 5.5 bags of wheat for every 1 bag of supplement

### Layer Ration

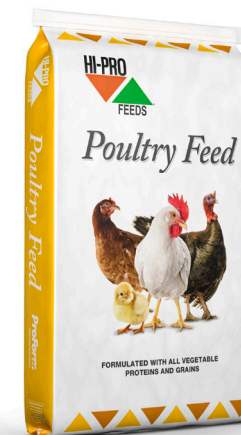

- Mix 300 kg #150081 36% Poultry Supplement with 700 kg #011401 cracked wheat or #011301 whole wheat
- Use 2.25 bags of wheat for every 1 bag of supplement

### Turkey Grower

- Mix 220 kg #150081 36% Poultry Supplement with 780 kg #011401 cracked wheat or #011301 whole wheat
- Use 3.5 bags of wheat for every 1 bag of supplement

## Note on Amprol

Poultry feeds are medicated with Amprol for the prevention of coccidiosis - a disease in young birds that causes blood in feces. Birds build immunity to coccidiosis over time, so medication is not required in older birds. Amprol is not approved for use in ducks, geese or specialty birds.
