

Shur-Gain/Trouw Nutrition ON Return Over Feed Report

Trends

- This month protein commodities have decreased again slightly in price and the milk blend price has rebounded from last month.
- 3x herds continue to maintain the top spot with respect to ROF and have the top spot for milk production as well. This may be an opportunity to grab some incentive days by switching to 3X milking.
- The total average feed cost is down slightly from last month due to lower commodity prices, however with the recent push through heat and fall incentives costs stayed elevated.
- Average milk production has increased from last month, mostly likely due to drive for milk and incentives.

August 2019 results

	\$/L	ROF	TFC/hd/d	Avg Milk (L)
AVERAGE	\$0.20	\$18.69	\$6.63	33.16
MIN	\$0.12	\$13.38	\$4.35	25.8
MEDIAN	\$0.20	\$18.77	\$6.59	33
MAX	\$0.27	\$24.57	\$8.79	41

*TFC/hd/d = Total feed cost per head per day
